

Thank you for your enquiry regarding replacing your water butts with one of our standpipes. Unfortunately, I am not too sure which standpipes you may have purchased for Allotments. If you could answer a couple of questions then I will be able to send you a quote for the correct standpipe.

1, How will the standpipe be installed?

Our tower standpipes are designed to be placed in the ground by 750mm

Our Iceberg standpipe is placed in the ground by 780mm with only 150mm above ground

Our plinth standpipes are bolted to hard standing above ground.

2, Which type of tap would you require?

We can supply the plinth and tower standpipes with either a 1/2" or 3/4" bib tap. Alternatively there is a push button tap which will automatically switch off after 7 seconds.

If you could let me have this information along with the quantity, billing and delivery address. I will then be able to provide you with a quote.
