

XXXXXXXXX would like to raise the ongoing issues and concerns relating to the water at Small Gains allotments. He has previously raised concerns and has been down to the office on a couple of occasions as well as reporting to a local councillor.

- The fittings on the tank are in a poor state of repair and require replacing.
- For the last few days the system has failed and has been discharging at full capacity wasting valuable water. XXXXXXXX has tried to suppress the flow, however it requires attention as a matter of urgency.

On another matter XXXXXXXX has raised with the clerk and chairman that the water is being utilised by contractors cleaning the tennis courts. On the last occasion after pressure washing they left the water running, seals have been damaged which he has now repaired at his own time and expense.

Accies Football club is also connected to this water as was the cycle club previously, both of which are not part of the allotment which the water is provided for.

As a matter of urgency can this be looked into and rectified as it is both of environmental and financial concern.
